## ***PROJECTS AND ASSIGNMENTS INVOLVED***

---

### **B. SC. FIRST YEAR SECOND SEMESTER DESIGNED A WEB SITE FOR AN ASSIGNMENT**

In this module, We had to create a website for a super market as a group project. Here we added some more user friendly features.

Eg :- add to cart, online purchasing, reliability features, etc.

### **B. SC. SECOND YEAR INFORMATION TECHNOLOGY PROJECT**

Here we developed a system for **Mercury Institute of Management in Sri Lanka** in **C#** language. The project was to implement a Student Management System. The project documents such as Project proposals, Software Requirement Specification and even the final document is also documented. The developed system carries out all the activities of handling student payments, course scheduling, student attendance handling and etc... Mainly the designed system has three user levels.

## B. SC. THIRD YEAR PROJECT MANAGEMENT & DESIGN PROJECT

As the project of the third year under the PDM module we are supposed to develop a system for the given project requirements. It was an **Automated Election System** for the given project and consists with three modules.

- Voting module
- Election results analysis module
- Results Prediction modules.

The three modules are basically covered in two **C#.Net** standalone applications. One application covers the voting, preparations for the voting activities. The other application covers the results analyzing, counting activities and finally publishing the results
